Updates on Commission work

To provide visibility to media and the public, the Commission reports weekly on its operational activity, including the latest figures on Commission referrals, assessment, corruption investigations and matters before the court.

The Commission will continue to update these key figures each week on the homepage at nacc.gov.au for reporting purposes, but will no longer issue a weekly email and media alert announcing them.

The Commission will provide updates and announcements on work being undertaken on an ongoing basis and will deliver a monthly recap on activities to provide as much transparency as possible on operations underway.
